Beautiful flooring for real life.

Home has changed.

It's where we gather, work, relax, entertain and create memories. The flooring beneath us needs to do more than simply look beautiful. It needs to keep pace with everyday life.

Polystyl combines authentic Australian and European timber and stone designs with the practical performance of a continuous sheet floor. The result is a flooring solution that delivers the premium appearance of luxury plank flooring with fewer joins, easy maintenance and lasting comfort underfoot.

Beautiful spaces should also be practical spaces. That's why Polystyl is designed to help make everyday living easier.

Why choose Polystyl?

Authentic timber & stone designs
Contemporary Australian and European styling inspired by natural materials.

Continuous sheet flooring
Fewer joins create a cleaner, more seamless finish while helping reduce places where dirt and moisture can collect.

Warm & comfortable
Soft underfoot with improved comfort for everyday living.

Spill & water resistant
Designed to handle everyday spills and splashes, making it a practical choice for busy homes.

Easy maintenance
Our special surface protection treatments help resist scratches, stains and scuffs for easier cleaning.

Extra Matte Finish
Designed to give an authentic natural feel to your space.

Healthier indoor environments
Entirely phthalate-free with low VOC emissions for healthier indoor air quality.

Designed with sustainability in mind
Contains recycled materials and manufactured using responsible production practices.

Forum

Practical performance with exceptional value.

Forum combines contemporary timber and stone designs with a durable semi-commercial calendared foam backing designed for everyday durability.

- Semi-commercial construction
- 0.40 mm wear layer
- Warm underfoot
- Scratch resistant
- Easy maintenance

1 **PUR Treatment**
TopClean PUR protects against scratches, wear and stains

2 **Wear Layer**
Protects the design. Improves durability

3 **Printed Design**
Offers a large choice or colours and patterns

4 **Top foam layer**
Adds warmth and comfort underfoot. Grants outstanding sound insulation

5 **Fibreglass layer**
Prevents the flooring from expanding or contracting to give increased stability

6 **Back foam layer**
Offers the same advantages as the top foam layer for added performance

Designed for everyday living.

Beautiful floors are only the beginning.

Whether you're entertaining friends, raising a young family, working from home or simply enjoying everyday life, Polystyl is designed to deliver long-lasting performance with minimal maintenance.

Designed responsibly

Manufactured using European responsible production processes and recycled materials, Polystyl is designed with both performance and sustainability in mind.

Initial cleaning

It is always recommended to complete a thorough clean before using your new flooring.

Residual adhesive should be removed with methylated spirits and a clean cloth.

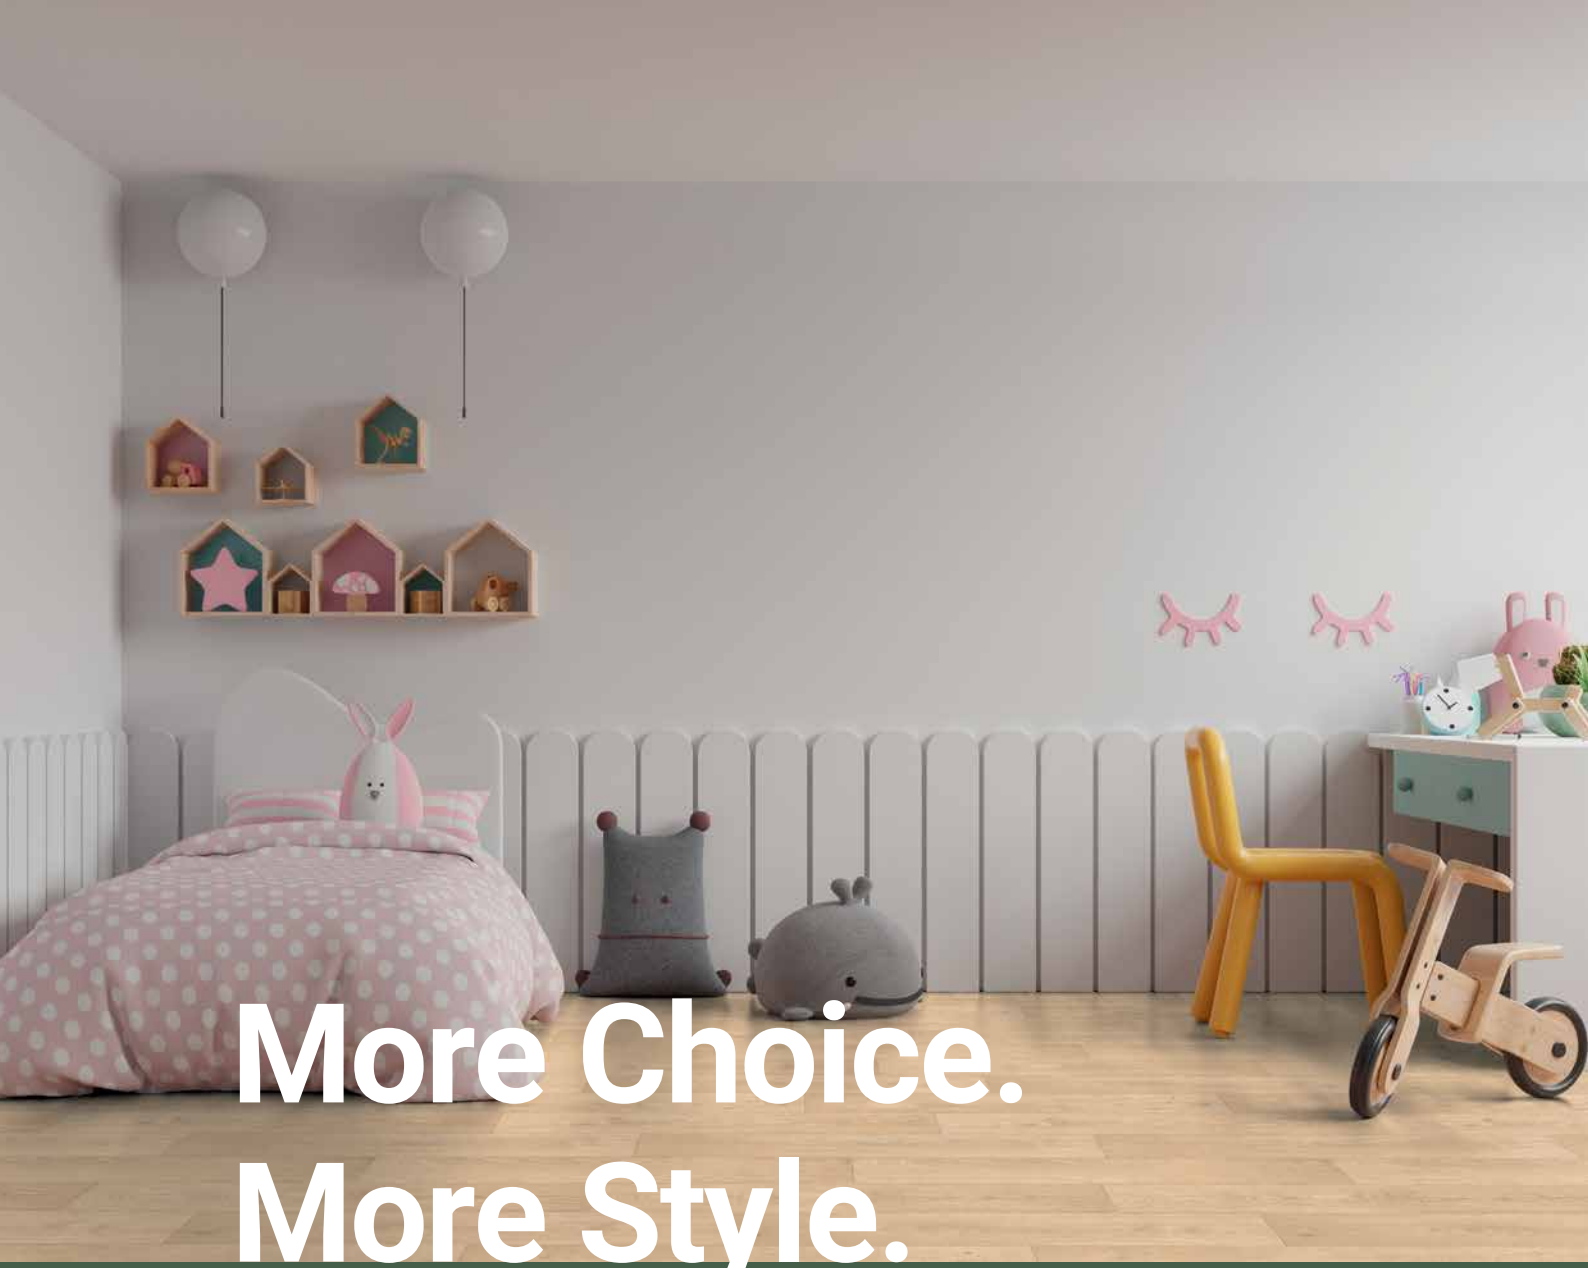

Lightly soiled floors: vacuum, sweep or damp mop the area to remove loose dirt and building dust.

For semi-professional sites and use, a combined machine is very effective for large areas (combined scrubber/dryer with cylindrical brushes for safety flooring).

Maintenance and care

- Clean the floors regularly, as this is more cost-effective and hygienic than occasional heavy-duty cleaning.
- Always follow dosage instructions carefully.
- Wipe up any grease and spilt oil immediately, as they may damage the surface.
- Resilient floors are damaged by solvents and abrasive powders.
- All chair and table legs should have good quality protective pads (felt or plastic).
- Remember that light colours need more frequent cleaning.
- Use entrance matting
- Daily and regular cleaning:
  - Dry mop or vacuum the floor to eliminate dust and dry soiling
  - Damp mop with diluted neutral detergent to eliminate soiling when needed
  - Treat stains immediately, spot clean by hand with a nylon pad and neutral detergent, work from the outside of the mark towards its centre. Rinse and wipe afterwards with clean water.

Please note: Certain rubbers, which contain anti-oxidants, can permanently stain your flooring. Some common causes of staining can be rubber backed mats and rugs along with certain types of rubber chair leg protectors. Staining can also result from coming into contact with chemicals, solvents, strong dyes and food colourings.
